

Guideline on **Internet Plan (Download Calculation)**

1. Mbps to Kbps: Formula: 1 Mbps = 1,024 Kbps.
2. To get download speed: Formula is plan in Kbps **divide** 8 (Example: A customer has opted for plan of 5 Mbps [or 5,120 kbps]; he/she gets download speed equal to $5,120/8= 640$ KBPS).
3. To choose plan for download speed: Formula is plan in Mbps **multiply** 8 (Example: If customer wants download speed of 5 Mbps, he/she needs a plan of $5 \times 8 = 40$ Mbps).
